ROOFING MADE SIMPLE

Pre-Roofing Checklist

- IMPORTANT: Make sure your driveway is clear on your material delivery date and build date.
- Move all personal belongings away from house (patio furniture, grills, yard decorations) and store away from the project area.
- If your Satellite dish is installed on the roof it will be replaced in the same holes, aimed in the same direction, unless instructed different. It's possible that the dish will need to be aligned by your satellite provider.
- Check the yard for dog droppings.
- If you have a fenced yard, keep an eye on your pets and/or keep inside. We will be going in and out of the gate and there will be construction debris.
- Solar yard lights are easily damaged, please remove.
- If you have an open garage ceiling remove all cars from garage and cover items that can not get dusty.
